

Dear Chamber Member,

The Carroll County Chamber of Commerce and CQI Associates are offering the opportunity for Chamber Members to host Lunch and Learn sessions at your location to inform employees about the Residential Energy Cooperative.

The Residential Energy Purchasing Cooperative is a **FREE** benefit to your employees. The power to help your employees save on their energy bills is in your hands. As more members participate, the purchasing power of the consumer increases, enabling members to purchase energy at more affordable and consistent rates than non-members. The benefits are immense, and joining is **FREE**. This program is sponsored by CQI Associates, who have over 19 years of experience negotiating lower rates with licensed electricity and natural gas suppliers.

The Chamber and CQI are offering Lunch and Learn sessions during the month of September, October and November 2015. This seminar has been designed to address the current confusing market created through slamming and high pressure tactics from multi-level marketers. "Power in Numbers - The Energy Co-Op Program" provides education to each employee about deregulation, choices available and how to understand billing. To get more information or to schedule a session at your office, please contact CQI Associates' representative Joe Tabeling at 443-472-3870 or email him at joe@cqiassociates.com.

This is a benefit that many Chamber members have taken advantage of. Please take the time to investigate this yourself and see how much you can save your employees on their energy bills.
